Forecast for Tuesday 28 Mar 2023

Weather: Cloudy with snow flurries at first. Rain will extend northwards during the morning with snow above 700m, becoming more persistent and heavier in south of area. Low risk of blizzard conditions on tops. Snow then gradually turning to rain at all levels, fizzling out during evening.

Chance of cloud-free hill tops above 800m: 50% at first decreasing 20% during morning, mainly in south of area.

Low cloud and visibility: Clouds initially well up the hills with good visibility beneath the cloud canopy. Clouds lowering during the morning, bases around 600 to 700m, especially in south and west of area with patches lower down in afternoon. Visibility deteriorating as precipitation moves in, becoming very poor or virtually nil in persistent sleet and snow.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Walking conditions becoming difficult on higher ridges/summits due to stronger winds, low temperatures, wintry precipitation and poorer visibility.

Forecast for Wednesday 29 Mar 2023
Weather: Cloudy with showery rain during the morning, just a few brighter interludes. More persistent rain will spread up from the south during the afternoon.

Maximum wind: Strengthening south or southeast winds, average speeds increasing 30 to 40mph on the tops with gusts 55mph in the afternoon.

Chance of cloud-free hill tops above 800m: 50%, best in north of area, decreasing 20% during the afternoon.

Low cloud and visibility: Fairly extensive cloud cover with fog above about 700 to 800m. Good visibility beneath the clouds but poor as showers pass by and in more persistent rain later. Higher cloud bases in north of area.

Temperature: **Glens:** Plus 6 Celsius rising to 12 Celsius.
At 800m: Plus 5 Celsius.
Freezing level: Above the tops.
